What is Bullying? Everyone needs to get involved to help stop it.

Talk to your children – watch for the signs.

Bullying is wrong! It includes: Verbal bullying, Social Bullying, Physical Bullying and Cyber Bullying. Approximately one in 10 children have bullied others and as many as 25% of children in grades four to six have been bullied. Studies have found bullying occurs once every seven minutes on the playground and once every 25 minutes in the classroom.

In the majority of cases, bullying stops within 10 seconds when peers intervene, or do not support the bullying behaviour.

Bullying makes people feel lonely, unhappy and frightened. It can make them feel unsafe and think there must be something wrong with them. Those who are bullied can lose confidence and may not want to go to school anymore. It may even make them sick.

Some people think bullying is just part of growing up and a way for young people to learn to stick up for themselves. But bullying can have long-term physical and psychological consequences. Children who learn they can get away with violence and aggression continue to do so in adulthood. They have a higher chance of getting involved in dating aggression, sexual harassment and criminal behaviour later in life.

Bullying is painful and humiliating, and kids who are bullied feel embarrassed, battered and shamed. If the pain is not relieved, bullying can even lead to consideration of suicide or violent behaviour.
